

Module 11 Quizlet - Objects

Please tell students in advance to come with their laptops, so they can share their code screen.

1. Write the code for an object for a book, that includes the following attributes
 1. Title
 2. Author
 3. Pages
2. Write the code to instantiate (create) a new book b1, with title="Physics", author="Resnick", and pages = 250
3. Copy reference of book b1 to b2
4. Change the title of book b2 to "Calculus". Check that b1.title also changed
5. Write a mutable function call to increase the number of pages by 10
